

Calgary

Are you looking for an exceptional program with an evidence-based approach to get your child ready for school?

The Centre for Autism Services offers an onsite program for children aged 2 years 8 months - 5 years 11 months (as of Sept. 1 of application year).

# CENTRE-BASED EARLY CHILDHOOD SERVICES

The Centre for Autism Services Alberta is an approved Early Childhood Services (ECS) provider through Alberta Education

Providing daily support focused on increased independence and self-regulation early in life can dramatically improve a child's ability to learn and succeed in school. We offer a program that is based on the best available evidence. With small class sizes and high teacher-to-student ratios, student learning is maximized.

## HOW IT WORKS

- Routines are filled with learning experiences in academics, communication, socialization, motor skills, and self-help skills
- Class time is a mix of play-based and structured activities with a strong emphasis on maximizing school readiness
- Activities focus on developmental and early education milestones
- Daily information is collected to show evidence of a child's learning
- Children move through goals at their own pace
- Strong emphasis on increasing independence, self-regulation, and self-determination
